Professional Summary

Data Analytics professional with a strong foundation in Python, SQL, Power BI, and business intelligence reporting. Passionate about transforming operational and logistics data into meaningful insights that improve decision-making and business efficiency. Experienced in data cleaning, exploratory analysis, dashboard development, KPI reporting, and workflow optimization.

Brings a combination of analytical thinking, technical problem-solving, and stakeholder collaboration, with hands-on exposure to export intelligence analytics, reporting automation, and cloud-based data workflows. Known for being detail-oriented, adaptable, and focused on building practical, data-driven solutions that create measurable impact. After graduation, I dedicated my time to developing and strengthening my data analytics skills through focused upskilling and hands-on learning.

Education

University of Mary Hardin Baylor
Master of Science in Information Systems

Belton, TX, USA
2022

Experience

ZigCodeLabs

Export Intelligence: Documentation & Risk Analytics

Remote, INDIA
Apr 2026 -Till date

Tools: Python, SQL, Power BI, Excel

- Leading a data analytics initiative focused on export documentation, logistics reporting, and compliance intelligence.
- Built data processing workflows using Python to clean and standardize raw shipping and regulatory datasets for accurate reporting.
- Used SQL to analyze historical export records and identify patterns related to logistics delays, compliance risks, and operational inefficiencies.
- Developed interactive Power BI dashboards to visualize export trends, shipment performance, and risk indicators for business stakeholders.
- Improved reporting reliability by implementing validation checks and structured data-cleaning processes across multiple datasets.
- Contributed toward building a centralized “Export Intelligence Dashboard” designed to support data-driven operational decisions.

GUS Education India LLP

IT Service Desk Associate

Hyd, TG
Aug 2025 – Jan 2026

- Supported day-to-day IT operations by resolving hardware, software, and network-related issues while ensuring uninterrupted productivity for internal teams.
- Managed and tracked technical support requests through structured ticketing workflows, improving issue visibility and response coordination.
- Assisted users with troubleshooting Windows OS, Microsoft Office applications, VPN connectivity, and system access issues across multiple business functions.
- Performed Active Directory administration activities including user onboarding, access provisioning, password management, and account maintenance.
- Collaborated with senior technical teams to identify recurring operational issues and support process improvements for faster issue resolution.

- Maintained clear technical documentation and communication with end users to ensure smooth resolution experiences.

Project

Automatic ID Card & Bonafide Certificate Generation with QR code

Sept 2022 – Nov 2022

- Developed a secure QR code generation system using Python to enhance data security and simplify access to digital credentials.
- Built a user-friendly data collection interface using HTML, streamlining user interactions and input validation.
- Designed and maintained an MS Access database to securely store and manage user information.
- Automated ID Card and certificate generation with Python, reducing manual processing time by over 30%.
- Optimised data queries and indexing within MS Access to improve data retrieval performance by 20%.
- Implemented robust data validation and error-handling mechanisms in Python to ensure system reliability and data accuracy.
- Conducted thorough unit and integration testing using PyTest, resulting in 95% code coverage and improved system stability.

Skills

Data Analytics

Python, SQL, DAX, Power Bi, SSMS, Excel, Data Visualization, KPI Reporting, EDA, Data Cleaning, Trend Analysis, Business Intelligence Reporting.

Data Engineering & Cloud

Azure Data Factory, Azure Fundamentals, Data Modeling, ETL, Data Validation, MS Access.

Tools

Windows OS, Active Directory, VPN Support, Ticketing Systems.

Certifications

Microsoft Certified: Azure Data Engineer Associate (DP-203).
